MEMORANDUM FOR THE RECORD

SUBJECT: Security Level of COINS

1. At the 17 April 1973 meeting of the USIB Security Committee, I briefed the membership on the decision of the Deputy to the Director for the Intelligence Community that effective 1 May 1973 the security level of the information handled within the COINS Network will be expanded to include TK material. I also made copies of the implementing memorandum of the D/DCI/IC dated 9 April 1973 available to the Security Committee.

2. In response to my request for guidance whether the Computer Security Subcommittee should prepare a report of its findings in studying the security aspects of the planned introduction of TK material to COINS, as earlier tasked, the Chairman, SECOM, with the approval of the membership, directed that all CSS efforts in this regard be terminated.

Chairman
Computer Security Subcommittee
